

SFTR METRO WATER DISTRICT
METER PIT MODIFICATION REQUEST

I am requesting removal of the pressure relief valve in my meter pit to increase the water pressure available on my lot. I fully understand that if components in the Metro's water distribution system should malfunction, I could see damaging pressures at my meter pit and beyond with the PRV removed. I am aware of the risk of damage to my system with this PRV removed and agree to hold the SFTR Metropolitan Water District harmless. I also understand and agree that if a system malfunction causes leakage and/or excess consumption, I will pay for my water usage as indicated by the water meter at my lot.
